Recycling Statement

David Ritchie & Sons Ltd actively support the protection of the environment by carrying out a total waste recycling process on all collected and received waste through our Aviemore Waste Recycling Centre. We are committed to our customers, their waste recycling requirements and improvements to the daily ever increasing problems with regard to waste management.

Since the opening of our Aviemore Waste Recycling Centre, a large investment has been put in place providing a modern facility which provides recycling solutions for paper, cardboard, glass, metal, wood, plasterboard, polythene, plastics, green waste, bio-degradables, soil, rubble, concrete, inert streams, electrical equipment, industrial, commercial and household waste.

All waste passing through the Recycling Centre is weighed and categorised and a weight ticket is produced. From here the recycling process takes place and on completion all recyclables are transported to the various merchants across the world. Current waste recycling figures show 95.33% of all handled waste is fully recycled.

We openly encourage our customers and the general public to “talk” to us, as we feel we are in a position to not only help the environment but to provide guidance on a cost effective and sensible means of waste management.

Having established our company in May 1958, David Ritchie remains active in the daily running of the business along with fellow Directors, wife Florence and Sons, Robert and Brian. Being a local family owned and operated company, we are confident that all our customers find us to be reliable, honest and helpful and only a phone call away if our services, or a friendly chat are required.
